Sun-Preneur

Revolutionary New Solsave Sun-Preneur Stall

The simple and easy access to make money for African entrepreneurs!

The Solsave Sun-Preneur Stall is a great new concept that endorses entrepreneurship in Africa. Each of our key stalls are ready to be used and manufactured in South Africa.

All stalls include a solar light and power unit, which is fully integrated in each unit. This means that entrepreneurs can start their own **business and make money using their own light and power, independent from any form of fixed electricity source**. The bigger stalls are fitted with a portable power unit that can be removed at the end of the day and taken home. This means the entrepreneur can provide a safe source of power and light to their families at home.

Each Solsave Sun-Preneur Stall can be purchased by:

- 1. Cash**
- 2. Monthly installment**
- 3. Cellphone operator airtime/sim card distribution contract**
- 4. Spaza shop sales and distribution account contract**
